

# Course content of Embedded Systems Course – Cohort-3

SEP/2025

# Schedule

| Date   | Content                                                                                                                 | Instructor       |
|--------|-------------------------------------------------------------------------------------------------------------------------|------------------|
| 13 Sep | Registration, Welcome address by management and former students, Agenda, Project demonstration                          | Management body  |
| 20 Sep | Computer Architecture - Part 1 - Lecture on RT Systems and CPU architectures                                            | Anant            |
| 27 Sep | Computer Architecture – Part 2 - Lecture on RT Systems and CPU architectures, Memory Architectures, ISA                 | Anant            |
| 4 Oct  | Quiz, C Program segments, Journey from Source to binary (Linker scripts)                                                | Vinay            |
| 11 Oct | Quiz, Linker script, Makefile                                                                                           | Vinay            |
| 18 Oct | Quiz, Flashing and loading using GDB on OpenOCD                                                                         | Vinay            |
| 25 Oct | Quiz, CPU start up, Journey from reset to main(), Impact of Cold and warm resets, Project on coding custom vector table | Ananth           |
| 8 Nov  | Quiz, GPIO, Project on blinking LED                                                                                     | Siddhesh / Vijay |
| 15 Nov | Quiz, Interrupts, Exceptions, Project -Hardware and Software generated interrupt & trap                                 | Siddhesh         |
| 22 Nov | Quiz, Timer, Project on code profiling                                                                                  | Vijay            |
| 29 Nov | Quiz, PWM, Project on open loop motor control                                                                           | Vijay            |
| 6 Dec  | Quiz, ADC, Project on sensor acquisition                                                                                | Vinay            |
| 13 Dec | Buffer lecture                                                                                                          |                  |
| 20 Dec | Hackathon, Felicitations, Certificate of completion                                                                     |                  |
